Attachments: EI Status sort by GW status.pdf; EI Status sort by HE status.pdf

Hi all,

Attached are the EI Status reports from SEMS. The first attachment is sorted by GW status and the 2nd is by HE status.

Fran, I wasn't aware that we are planning to get together. Please send me an invite so that I have it on my calendar.

Please let me know if you have any questions.

Thanks
Dianna

Hi Dianna,

Thanks for pulling the information together for Bill.

The same memo asks us to pull together all sites "where the risk of human exposure is not fully controlled". Per Fran, that includes sites not under control and sites with insufficient information.

Fran went on to say that the two of you are planning to get together to review and update the information. Please do so in the next few weeks so we can get this information to HQs.

Thanks,

Russ

I'm reading the Superfund Task Force Recommendation and I can see why you're asking for the information. This is why I felt that it's so important that we have site schedule up to date in SEMS. Your support in this is greatly appreciated.

Thanks
Dianna

Thanks Dianna for the super quick response! The new administration is very interested in getting sites deleted, so I want to start taking a hard look at each of these sites.

Bill

Correct.

Thanks
Dianna

Subject: SEMS report

Dianna,

Can you or Tyler provide me with a SEMS report listing alpha by state all the NPL sites in R8 that have achieved CC but are not yet deleted?

Thanks!

Bill
